K. E. Torrance, *Ithaca, New York*
J. H. Whitelaw, *London, UK*
O. C. Zienkiewicz, *Swansea, UK*

AIMS AND SCOPE: *Numerical Heat Transfer* seeks to provide a forum for papers dealing with the methodology and with the results of numerical solutions of problems in heat and mass transfer and in related fluid flows. The methodology papers should describe new or improved formulations of numerical schemes and/or innovative solution techniques. Papers concerned with inputs to the numerical treatment of heat/mass/fluid flow problems, for instance, mathematical modeling of complex physical processes, are also within the scope of the journal. The journal will also publish papers that present results of numerical solutions of heat/mass/fluid flow problems. These results should convey new findings for problems relevant either to basic research or to applications.

EDITORIAL STAFF: Louis M. Fancher, *Editorial Director;* Barbara A. Bodling, *Managing Editor.*

NATIONAL ADVERTISING REPRESENTATIVE: Arthur C. Lipner, Weston Media Associates, 37 Gray's Farm Road, Weston, Connecticut 06883. Phone (203) 226-0478 or (212) 725-1999.

SUBSCRIPTION RATES (Twelve issues per year in two volumes): Institutions—U.S. $369.00 per year, elsewhere $401.00 per year. In order to facilitate the availability of this journal to individuals at a reduced rate, those persons whose affiliated library has subscribed may order a subscription at the special discount rate of $79.50 per year ($111.50 outside the U.S.). To qualify for this discount, the individual's institutional library must be identified on the order card. The special reduced rate is available to individuals not affiliated with an institution, but a statement to this effect must appear on the order card. Individual subscriptions must be accompanied by a personal check or money order.

SUBSCRIPTION SERVICE: Shipments will be made only upon receipt of remittance. All payments and communications related to handling subscriptions, including notifications of change of address, should be sent to Subscriptions Department, Hemisphere Publishing Corp., 79 Madison Ave., New York, NY 10016; phone (212) 725-0772. Change of address notices should provide the old as well as the new address, including zip code number. Changes will become effective within approximately 20 days. Missing copies will be replaced only if valid claims are received within 90 days from date of mailing. Replacements will not be allowed if the subscriber fails to notify the publisher of a change of address or if a copy is misplaced at destination. Request for refund will be honored only prior to delivery of issue number 1 of each volume.

NUMERICAL HEAT TRANSFER: An International Journal of Computation and Methodology (ISSN 0149-5720) is published monthly in two volumes for $369.00 per year (libraries and institutions) or $79.50 per year (individuals) by Hemisphere Publishing Corporation, 1010 Vermont Ave., N.W., Washington, DC 20005. Second-class postage paid at Washington, DC and additional mailing offices. POSTMASTER: Send address changes to NUMERICAL HEAT TRANSFER, Hemisphere Publishing Corporation, 79 Madison Ave., New York, NY 10016.

Numerical Heat Transfer, Volume 9, Number 6, June, 1986

CONTENTS OF VOLUME 9

NUMBER 1

1 A Skewed, Positive Influence Coefficient Upwinding Procedure for Control-Volume-Based Finite-Element Convection-Diffusion Computation **G. E. Schneider and M. J. Raw**

27 A New Finite-Difference Method for the Nonlinear Inverse Heat Conduction Problem **M. Raynaud and J. Bransier**

43 A Unified Model of Radially Symmetric Heat Conduction **T. V. Hromadka II**

59 Numerical Analysis of Two-dimensional Transient Freezing Including Solid-Phase and Tube-Wall Conduction and Liquid-Phase Natural Convection **E. M. Sparrow and Y. Ohkubo**

79 Numerical Predictions of Freezing in a Vertical Tube **E. M. Sparrow and Y. Ohkubo**

97 A Model for Enhanced Cooling Near the Edge of a Packed Bed **M. T. Dalman, J. H. Merkin, and C. McGreavy**

TECHNICAL NOTE

115 A Calculation Scheme for Computing Turbulent Shear Flows in the Developing Region Using Closure Models **P. E. Wood and C. P. Chen**

NUMBER 2

125 Prediction of Heat and Fluid Flow in Complex Geometries Using General Orthogonal Coordinates **G. D. Raithby, P. F. Galpin, and J. P. Van Doormaal**

143 Solution of Three-dimensional Convection-Diffusion Problems Using Tetrahedral Elements and Flow-Oriented Upwind Interpolation Functions **Barbara LeDain Muir and B. Rabi Baliga**

163 Optimal Thermal Insulation by the Boundary Element Method **R. A. Meric**

183 Thermal Performance of Diabatic Cyclic Regenerators **P. J. Heggs and E. A. Foumeny**

201 Numerical Study in Heat Transfer for a Turbulent Pulsed Ducted Flow **P. Andre, R. Creff, and J. Batina**

217 Natural Convection in an Inclined Enclosure with an Off-Center Complete Partition **C. H. Tsang and S. Acharya**

241 Discussion of Upstream-Weighted Advection Approximations for Curved Grids **P. F. Galpin, G. D. Raithby, and J. P. Van Doormaal**

TECHNICAL NOTE

247 Addendum to Eigenvalue Method for Solving Transient Heat Conduction Problems **D. W. Landry and B. Kaplan**

251 Announcement

NUMBER 3

253 An Improved Control Volume Finite-Element Method for Heat and Mass Transfer, and for Fluid Flow Using Equal-Order Velocity-Pressure Interpolation **C. Prakash**

277 A Conservative Isoparametric Spectral Element Method for Forced Convection; Application to Fully Developed Flow in Periodic Geometries **N. K. Ghaddar, G. E. Karniadakis, and A. T. Patera**

301 Numerical and Experimental Turbulent Heat Transfer Results for a One-Sided Heated Rectangular Duct **E. M. Sparrow, A. Garcia, and W. Chuck**

323 Finite-Element Analysis of Laminar Natural Convection in Confined Rectangular Regimes—Extrapolation to Zero Element Size **Hiroyuki Ozoe, Motoji Takemoto, and Stuart W. Churchill**

335 A Numerical Study of Heat Transfer in Turbulent Shear Flow **Brian R. Circelli and John B. McLaughlin**

349 Heat Transfer in Axially Dispersed Two-Phase Flow Systems **M. N. Oğuztöreli, M. P. duPlessis, and B. Özüm**

365 A Numerical Description of Condensation in Nonhygroscopic Regenerator Matrices **J. van Leersum**

NUMBER 4

381 A Mixed Implicit-Explicit Variable Grid Scheme for a Transient Environmental Ice Model **John F. Dilley and Noam Lior**

403 Finite-Element Enthalpy Method for Discrete Phase Change **A. M. Cames-Pintaux and M. Nguyen-Lamba**

419 Heat and Mass Transfer at an Upstream-Facing Blunt Face Situated in a Uniform Oncoming Flow **S. S. Kang and E. M. Sparrow**

441 Combined Buoyancy- and Thermocapillary-Driven Convection in Open Square Cavities **T. L. Bergman and S. Ramadhyani**

453 Second-Order Upwind Differencing Method for Nonisothermal Chemical Transport in Porous Media **C H. Lai, G. S. Bodvarsson, and P. A. Witherspoon**

473 Nonisothermal Mass Transport in a Flat Conduit for Flow of Non-Newtonian Liquid **Helmut F. Bauer**

495 The Axisymmetric, Turbulent, Buoyant Jet—Numerical Solution for a Semiempirical Theory **Graham Wilks and Roland Hunt**

NUMBER 5

511 A Multigrid Method Based on the Additive Correction Strategy **B. R. Hutchinson and G. D. Raithby**

539 Analysis of Heat Transfer during Melting of a Pure Metal from an Isothermal Vertical Wall **B. W. Webb and R. Viskanta**

559 A Study of Recirculating Flow Computation Using Body-Fitted Coordinates: Consistency Aspects and Mesh Skewness **M. Braaten and W. Shyy**

575 Conjugate Mixed Convection Heat Transfer Analysis of a Plate Fin Embedded in a Porous Medium **Jin-Yuan Liu, W. J. Minkowycz, and P. Cheng**

591 Mixed-Convection Flows within a Horizontal Concentric Annulus with a Heated Rotating Inner Cylinder **Toru Fusegi, Bakhtier Farouk, and Kenneth S. Ball**

605 Laminar Mixed Convection in a Symmetrically or Asymmetrically Heated Vertical Channel **S. Habchi and S. Acharya**

619 Transient Heat Transfer in Channel Flow with Step Change in Inlet Temperature **R. M. Cotta, M. N. Özişik, and D. S. McRae**

TECHNICAL NOTE

631 Comparative Study of Two Numerical Procedures for Free-Convection Problems **Krishnamurthy Muralidhar and Selcuk I. Guceri**

NUMBER 6

639 Parallel Computations in Heat Transfer **Tien-Mo Shih, Linda J. Hayes, W. J. Minkowycz, K.-T. Yang, and W. Aung**

663 A Method for Solving Transient Diffusion Problems **Yi-Hsu Ju and Wen-Chien Lee**

677 Laminar Forced Convective Heat Transfer in Two-Dimensional 90° Bifurcation **J. M. Khodadadi, T. M. Nguyen, and N. S. Vlachos**

697 Vortex Instability of Natural Convection Flow over Horizontal and Inclined Plates with Uniform Surface Heat Flux **H. C. Tien, T. S. Chen, and B. F. Armaly**

715 Unsteady Natural Convection Generated by a Heated Surface within an Enclosure **A. Khalilollahi and B. Sammakia**

731 Transient Conduction from a Finite Cylinder with Time-Varying Internal Heat Generation **R. E. Faw and J. K. Shultis**
